

### STOOL PREPROCESSING DEVICE

The power of standardization... in just 5 minutes

PIONEERING DIAGNOSTICS

### STOOL PREPROCESSING DEVICE.

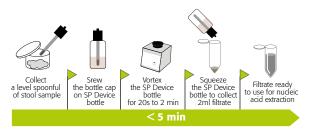

### SPENDING TOO MUCH TIME PREPROCESSING STOOL? YOU DON'T HAVE TO.

Stool samples are among the most difficult and time-consuming clinical samples to process for molecular biology assays. This is now a thing of the past thanks to bioMérieux's new 4-step stool preprocessing device. It standardizes stool sample preparation for nucleic acid extraction of viruses, bacteria and parasites. And it only takes about 5 minutes.

## Collect stool 1000 µl 1000 µl

### bioMérieux Stool Preprocessing Device use

# Filters Retain fecal debris Smooth bottle Filtration Buffer Sample resuspension Spoon Calibrated sample 200mg Glass beads Homogenisation

### STANDARDIZE STOOL PREPROCESSING

- Calibration of the sampling
- Validated for qualitative and quantitative applications

### **SAVE HOURS - NOT MINUTES**

- Just 5 minutes hands-on time
- Ready-to-use filtered solution for nucleic acids extraction

### **EXPERIENCE SIMPLICITY**

- No sample weighing
- No pipetting

#### STOOL SECURE PROCESSING WORKFLOW

- Entirely closed process
- No sample contamination

PRODUCT NAME	REFERENCE
Stool Preprocessing Device	Ref. 421061
Stool Preprocessing Device Vortex adapter	Ref. 422152
Stool Preprocessing Device Rack	Ref. 422163
