## How much time would a complete monitoring solution save your lab?

Designed by a laboratory provider
Labguard combines **hardware,
software** and **services**

Enter the world of Labguard® and
bring bioMérieux quality standards into your organization

QUALITY enhancement
- Comply with applicable quality requirements
- Ease audits and accreditation
- Immediate corrective action
- Measurement accuracy

COST effective
- Frees up technicians' valuable time through automated monitoring
- Secures products and avoid waste
- One single Web based software license
- Wireless ISM technology minimizing implementation cost

labguard™

Peace of MIND
- Optimal storage conditions
- 24/7 monitoring
- Real time alert notification
- bioMerieux Customer Service

BIOMERIEUX PERFORMANCE SOLUTIONS™
● Workflow Optimization ● Quality & Compliance Services
● Training and Education ● Instrument Services ● IT Solutions

BIOMÉRIEUX

Does your monitoring solution meet your needs?

In today's increasingly competitive environment, you are concerned about ensuring quality and safety while at the same time making appropriate use of your resources. You need to:

- Secure culture media, reagent and sample storage and/or shipping conditions.
- Facilitate regulatory compliance and quality control.
- Easily monitor all environmental parameters and be immediately informed of any deviation.
- Save money and free-up valuable technician time.

To help you meet these daily challenges, we have designed an all-inclusive monitoring solution:

- **24/7 monitoring** and **real-time alert** notification.
- Fully **secured wireless** solution.
- **Flexibility** for labs from **simple to multi-site installations.**
- Access to **bioMérieux customer service**.
- **Audits, compliance and accreditation** made easy.

Labguard® Hardware

- Wide range of probes
- **Datalogging** mode and/or **real-time** mode transmission
- Ethernet receivers
- Accessories (wireless repeater, flashing light/siren, SENSEviewer touchscreen...)

Documentation

- IQ, OQ, PQ protocols
- On-line multilanguage user manuals
- Mapping report
- Calibration certificates

labguard™

Labguard® Software

24/7 real-time monitoring
- Data immediately sent to central system

Flexibility and scalability
- Adapted for small, medium and multi-site labs
- Easily add new measuring points at any time
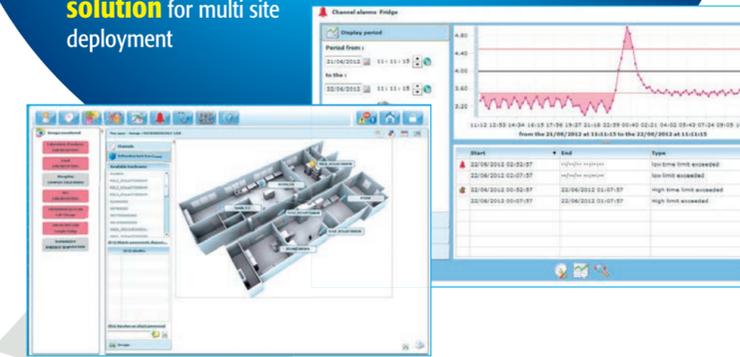

Easy-to-use and install
- Automatic detection of connected hardware
- **True Web Server solution** for multi site deployment

Traceability and security
- Double data storage local transmitter and **professional postgreSQL database**
- Ease compliance with ISO EN 17025 and 15189

Immediate alarm notification
- Remote alarm notification via phone, SMS, e-mail, Fax
- Automatic display of alarm messages on every connected PC (Widget)

Complete range of services

- Access to the bioMérieux customer service network
- Pre-audit before installation
- Installation, training, on-site set-up
- Maintenance contracts
- 17025 accredited metrology services
- On-site qualification service available (IQ,OQ, PQ)

Transport solutions

- Range of autonomous dataloggers (USB or Wireless)
- Designed for mobile applications transport
- Fully compatible with software
- Continuous traceability of temperatures
- Cost effective

Tomkey

Tomprobe

Metrology solutions

- bioMérieux calibration and mapping services
- Plug & Play tools (calibration kit, mapping kit and calibration bath)
- Metrology training
